

**Abstract**

The present invention relates to a compound of formula I

wherein

$R_1$  is a heterocyclic radical or an unsubstituted or substituted aromatic radical;

$G$  is  $C_1\text{-}C_7\text{-alkylene}$ ,  $-C(=O)\text{-}$ , or  $C_1\text{-}C_6\text{-alkylene-}C(=O)\text{-}$  wherein the carbonyl group is attached to the piperazine moiety;

$Q$  is  $-NH\text{-}$  or  $-O\text{-}$ , with the proviso that  $Q$  is  $-O\text{-}$  if  $G$  is  $-C(=O)\text{-}$  or  $C_1\text{-}C_6\text{-alkylene-}C(=O)\text{-}$ ; and

$X$  is either not present or  $C_1\text{-}C_7\text{-alkylene}$ , with the proviso that a heterocyclic radical  $R_1$  is bonded via a ring carbon atom if  $X$  is not present;

or a salt thereof, which is useful for treating anti-proliferative diseases.
